

CTP Lunch and Learn

Spring, 2018

Thursday, February 8
12:00-1:00 p.m.
219 Peabody

Featured Scholar: Dr. Ashley B. Clayton **Using Federal Datasets to Examine Educational Outcomes**

Dr. Ashley Clayton is an Assistant Professor of Higher Education at Louisiana State University. She earned her PhD in Educational Research and Policy Analysis (Higher Education) at North Carolina State University. Dr. Clayton's research agenda broadly focuses on postsecondary outcomes for underrepresented student populations. Specifically, her research examines the barriers, systems, and policies that aid or inhibit postsecondary access and success for underrepresented student populations.

In this presentation, Dr. Clayton will present an overview of the available datasets from the National Center of Education Statistics (NCES) and how to obtain a restricted-use license. She will provide examples of potential research questions that can be answered using federal data. Lastly, she will discuss research studies she conducted utilizing various NCES datasets.

Sponsored by the Curriculum Theory Project School of Education, the Lunch and Learn Series is an effort to allow faculty and students to learn from fellow colleagues and to present works in progress to the scholastic community. All students and faculty are welcome. Free refreshments will be provided.
